

Walk2Future

Scalable, robust system

- common problem 4 Non profits
- scoring system is generic
- open REST api
- mongo db allows us to scale

What did we do?

- Sentry for students to request for jobs
- Form for employer to submit a job
- Ranking
- Rank the jobs best suited to a candidate based on distance and profile to help Walk2Future

3 Step process

- Ability for students or parents to access 30 days but a job
- Employers to be able to post their job
- Walk2Future to create the jobs and help the students to get jobs

Problem of Hand

- Students are able to find the perfect job
- Employers are able to find the perfect candidate
- Walk2Future is able to help the students to get jobs

Walk2Future

Scalable, robust system

- common problem 4 Non profits
- scoring system is generic
- open REST api
- mongo db allows us to scale

What did we do?

- Form for students to request for job
- Form for employer to submit a job opening
- Rank the jobs best suited to a candidate based on distance and profile to help Walk2Future

3 Step process

Ability for Students or potential candidates to apply for a job

Employers to be able to post their job opening

Walk2Future to curate this data and help the students find jobs

Problem at hand

Students are not able to find service jobs
Walk2Future are finding it hard to manage data
Lacking enough shares to maintain list of volunteers
recruiting jobs and data available more from

Problem at hand

Students are not able to find summer jobs

Work2Future are finding it hard to maintain data

Using excel sheets to maintain list of students needing jobs and jobs available near them.
